

Amartech Engineering Equipment trading

The company was created to provide customers with electrical equipment and engineering solutions that ensure the operation of power systems

We are the team of knowledgeable experienced engineers from the deep understanding of the energy market and logistics of international supplies.

The company was founded in the United Arab Emirates and operates in the markets of the EU, neighboring countries and Asia.

Our key advantages:

- Highly intellectual decisions and design of equipment
- Official deliveries with all necessary licenses and certificates of compliance.
- Long-term contracts with leading global manufacturers.
- Flexibility of supply: from single orders to large-scale industrial projects.
- Full deal support: from finding a manufacturer to customs clearance and logistics.

The company is a partner of world manufacturers and suppliers of equipment such as Power Plus Cable (UAE), Jeddah Cable Company (UAE), ChinSun (China), HYEE (China), Chint (China), Nenghui Energy (China), Tefelen Preisenger (Germany), Schnieder Electric (France), Siemens (Germany), ABB (Germany), Hitachi, Voltera (Poland) and so one

The company supplies:

- High-voltage electrical equipment 35-750 kV
- High-voltage bushings and wall bushings, insulators
- Current and voltage transformers up to 750 kV
- High-voltage SF6 Circuit breakers, switches and Disconnectors
- Line Traps and Surge arrestor
- Busbar system with RIP isolation up to 40,5 kV and 8000A
- Power cable 10-20 kV and fittings
- Power transformers 10 – 330 kV
- Sun Station and energy storage

We complete with full range of equipment for power substation and generation

We don't just supply equipment - we ensure the continuity of energy processes.

Best Regards

General Manager

Ruslan Lebedenko
